**Availability Update for Epinephrine Injection, USP
1 mg/10 mL (0.1 mg/mL) ABBOJECT® Syringe**

Dear Customer,

Last month, Pfizer Hospital announced an interruption in supply of **Epinephrine Injection, USP 1 mg/10 mL (0.1 mg/mL) ABBOJECT® Syringe (NDC # 00409-4933-01)** due to a manufacturing delay. Consistent with our ongoing efforts to provide timely and transparent supply updates to customers—and understanding the importance of this product to patients and health care professionals—we committed to sharing additional information no later than the week of November 15, 2021, which is the intent of this letter.

At this time, Pfizer has determined the root cause of the delay and is working toward a path to resolution in close consultation with the U.S. Food and Drug Administration (FDA). Understanding the need to plan for patient care, Pfizer is providing an estimated timeline to return to production and product releases by mid-2022. However, this timing remains dependent on a number of variables, and we continue to evaluate opportunities to further expedite the resolution process. At the same time, Pfizer is also exploring other potential options to provide alternative supply on a limited basis while we work to resolve the manufacturing delay.

Pfizer will continue to provide updates on this situation, including sharing more specific details on expected next delivery and recovery dates, as information becomes available. The Pfizer Hospital [Availability Report](#), accessible on the PfizerHospitalUS.com homepage, will also be updated daily with the latest information on product status.

For product availability questions, please reach out to your Pfizer Hospital sales representative or account executive. Alternatively, the Supply Continuity Team can be contacted between 7 a.m. and 6 p.m. (CT) at 1-844-646-4398 (select option 1 [Customer], then option 3 [Supply Continuity Team]). For medical inquiries, please contact Pfizer Medical Information at 1-800-438-1985.

Thank you,
