Product NDC Change

Dear Valued Customer,

Pfizer Hospital is pleased to share the NDC change for **Fluconazole in Sodium Chloride Injection, USP 400 mg/200 mL (2 mg/mL) Flexible Container** is now available at wholesalers and distributors (please note locational inventory may vary).

While there is a difference in NDC and label, as detailed in the Product Information table below, please note there is no change to unit of use price, unit of sale size, or indications. Please keep in mind that as we transition to the new NDC, 00409-4321-24, both labels may be in the marketplace temporarily.

Please note: We have identified a packaging error impacting initial lots 54524001, 54524002, 54524003, 54524004, 54524005, 54524006, 54524007, and 54524008. Specifically, the NDC number located on the product's outer carton is incorrect. The NDC encoded on both the flexible container (I.V. plastic bag) and secondary (overwrap) remains accurate, and the outer carton error does not impact the overall traceability or identification of the scanned products. To read the packaging error notification in its entirety, [click here](#).

TRANSITION TABLE
