**Product Discontinuation Notice:  
Multi-Vitamin Infusion Products**

Dear Customer,

Pfizer Hospital is committed to providing timely supply information so that you can plan for patient care. As such, we want to inform you of our plans to discontinue the multi-vitamin infusion products detailed in the table below.

Pfizer's adult and pediatric intravenous multi-vitamin products have been unavailable since March 2019 following the discontinuation of a third-party supplied raw material, an Active Pharmaceutical Ingredient (API), necessary for their production.

Since this time, Pfizer has been diligently working to identify an acceptable API source from an alternate supplier in an effort to return these products to market. Unfortunately, after a thorough exploration and evaluation of potential alternatives, Pfizer has not been able to identify a viable API replacement and, as a result, will discontinue multi-vitamin for infusion products moving forward.

Unit of Sale NDC	Product Description
61703-0421-53	M.V.I. Pediatric™ (multi-vitamin for infusion) Single Dose Glass Fliptop Vial
61703-0434-82	M.V.I. Adult™ (Multi-Vitamin Infusion) 2 x 5 mL Single Dose Dual Glass Fliptop Vials
61703-0422-83	M.V.I. Adult™ (Multi-Vitamin Infusion) 2 x 50 mL Pharmacy Bulk Package Dual Glass Fliptop Vials

As these products have been off market since March 2019, we do not anticipate any change to current market supply as a result of this decision. For medical inquiries, customers should contact Pfizer Medical Information at 1-800-438-1985. For any other questions, please reach out to your Pfizer Hospital sales representative or account executive.

Thank you,

Melissa Smetana  
Sr. Portfolio Manager, Micronutrients
